Quick description of the company:

Midrex offers leading technology for decarbonizing the iron and steel industry through direct reduced iron (DRI). DRI is the most environmentally friendly method to supply the steel industry with the iron needed for high-quality steel production. As the industry leader, Midrex produces about 80% of the world's low CO₂ DRI and has been operational for over 50 years, with nearly 100 modules across 21 countries.
